

# MEHDI DRIDI

0160 6914461 ◇ dridignu@gmail.com ◇ github.com/mehdignu ◇ mehdi-dridi.com

## EDUCATION

---

**University of Applied Sciences**  
*B.ASc in Applied Computer Science*

October 2015 - February 2020  
*Berlin*

## WORK EXPERIENCE

---

**FunkeDigital**  
*FullStack engineer - full time*

April 2020 - present  
*Berlin*

- same as the previous part time tasks

**FunkeDigital**  
*FullStack engineer - part time*

April 2019 - March 2020  
*Berlin*

- Developing and contributing to the superdesk project - the open content management system for professional journalists.
- Developing Symfony, flask and react according to TDD methodology.
- writing clean and efficient code according to S.O.L.I.D. principles.
- Building a recommendation System for news articles using TF-IDF and cosine similarity.
- Taught myself Docker and Kubernetes and shifted superdesk to the rancher custom cloud implementation
- Building and maintaining CI/CD pipelines using github, GoCD and Rancher.
- Technologies used: python, php, TypeScript, React, html/css, Docker, AWS, Symfony5, git, flask, kubernetes, celery.

**LimeFlavour**  
*FullStack engineer - part time*

February 2017 - January 2019  
*Berlin*

- Developing Typo3 extensions and Debugging Typo3 update/upgrade.
- Developing single page web applications using react and redux.
- Using php, html, css, javascript ES5/ES6, jQuery, React with redux and Typo3 CMS

**Freie Universität Berlin**  
*FullStack engineer - part time*

May 2016 - January 2017  
*Berlin*

- Worked on debugging and developing Potsdam MAIB backend. Using php, html, css and javascript.

## PROJECTS

---

**Morgentee**

morgentee.com

- imported world news articles from 20 sources and developed a machine learning algorithm to generate the top and most important news headlines always on real time. I've used celery with django to import the news headlines, spark developed with scala to run the machine learning algorithm (TF-IDF) to generate the top headlines, Next.js for the frontend and digital ocean for hosting.

## TECHNICAL SKILLS

---

<b>Languages</b>	PHP, JavaScript, Typescript, HTML5/CSS3, SQL, JAVA, Python, scala
<b>Frameworks</b>	Typo3, Spark, Symfony4, React.js, Next.js, Node.js, Django3
<b>DevOps skills</b>	Docker, Kubernetes, GoCD, Rancher

## LANGUAGES

---

English	German(C2)	french	Arabic
